WORK EXPERIENCE

Currently

Groww India - SDE Intern (Web)

| Jan'22 - Present

Groww.in (Onboarding Pod)

- Revamped main onboarding user flow for mSite, made it a dynamic onboarding flow, driven from the APIs, automatically switching to manual KYC if Digilocker is unavailable.
- Revamped **Fixed Deposits user flow** and **Futures & Options UI** for desktop.
- Learned how to collaborate and keep in sync with different teams & stakeholders.

TechStack - TypeScript, ReactJS, JavaScript, Preact, Redux

ScoopWhoop Media Pvt. Ltd. - Frontend Developer Intern | July'21 - Dec'21

Scoopwhoop.com - Internet Media (Avg. 30 million monthly visitors)

- Worked upon **www.scoopwhoop.com's major revamp**, switching from VanillaJS templating to **NextJS** from scratch.
- Added and leveraged **Sentry** to find and fix bugs.
- Deployed **AMP** for performant webpages.

Scoopwhoop.com's CMS

- Learned **VueJS** and improved upon existing autosave feature in CMS, by providing manual save and reducing the api calls at every 10 seconds to 1 per 2 mins, **resulting in 80% less api calls, far more reliant and performant website.** (Significantly improving Content Writers UX)

Unscripted.news - Video-Streaming platform (Avg. 30k monthly users)

- Built the WebApp's main feature-rich **Video Player**.
- Analyzed & increased WebApp's **performance by 30% & reduced bundle size by 40%** by removing react-bootstrap & swiperjs library with better solutions.
- Refactored code & increased readability by increasing the number of comments by 50% and improving the structure of code, making it more modular.
- Successfully developed & deployed new features in an Agile team.

TechStack - JavaScript, React, Vue, Next, Redux, Tailwind, BootStrap, Axios, HTML|CSS, SASS, BitBucket, Jira

VPS Techub - React Developer Intern | Feb'21 - July'21

Saycheese.life

- Worked upon a women-wellness centric website, built the website's core feature, which are self-learning modules, which aim to help women with their personal & professional lives by providing them coaching and therapy sessions.
- Restructured & reduced the number of react components in a module from 110+ to just 20, by **increasing abstraction and code modularity**. Built 3 modules **multi-step wizard** with 300+ screens to collect and convey information with quizzes and animations.
- Fixed issues of multiple rendering of same component and multiple API calls by using **higher order components** in react.
- Added global state management of application by using **Redux**.
- Added **responsive CSS** and reduced the number of lines of code.
- Added Google & Facebook **authentication** flow.
- Also built features like **Cart System** using **ContextAPI**, Filtering & Sorting of products and home-page on the e-commerce WebApp for the same.

TechStack - ReactJS, Redux, BootStrap, Axios, HTML|CSS, SASS, GitLab, Asana

LS&CG - Full Stack Developer Intern | Sep'20 - Jan'21

- Built a **RESTful API** for internal website.
- Used NodeJS and ExpressJS to handle requests.
- Implemented authentication using OAuth 2.0.
- Built complete dashboard using Component-Driven Dev. in ReactJS & Storybook

TechStack - JavaScript, React, Redux, BootStrap, Axios, HTML/CSS, SASS
